Snowplow Mobile Data Collection

Presenter

Steve Spoor

Maintenance Services Manager
Idaho Transportation Department
steve.spoor@itd.idaho.gov

Co-Presenter

Snowplow and Material data is collected electronically and stored on a server. Operators then view and correct data utilizing GIS maps and tables. Once data is reviewed, the data is then electronically submitted to our Maintenance Management System via an interface. This project is on-going deployment in which Phase 1 will be completed by the dates of the symposium.

Bio(s):

Steve is the Maintenance Services Manager for the Idaho Transportation Department with direct responsibility for Maintenance oversight, and Fleet Management. Steve has held this position for 4 years.
