

4.3.2

Building the Enterprise, One Office/One Widget at a Time: Maryland State Highway Administration's Deployment of an Enterprise GIS (eGIS) Solution Utilizing the ArcGIS Server API for Adobe Flex 2.0

Presenter

Michel Ney Sheffer, GISP, CFM
GIS Program Coordinator
Maryland State Highway
Administration
msheffer@sha.state.md.us

Co-Presenter

The Maryland State Highway Administration (SHA) has launched an Enterprise GIS (eGIS) solution utilizing ESRI ArcGIS Server API for Adobe Flex 2.1. This presentation will highlight the factors that have helped shape our approach to and implementation of an eGIS, including the history of GIS at SHA, and the political, organizational and technological factors leading to our design criteria.
