

4.4.3 TxDOT's Statewide Planning Map

Presenter

Michael Chamberlain
Texas DOT
MCHAMB1@dot.state.tx.us

Co-Presenter

The Transportation Planning and Programming Division of TxDOT developed a web based map similar in function to Google Maps and Microsoft's Virtual Earth to display planning related data. Users can pan and zoom, switch between multiple maps, overlay traffic counts, search and zoom to features and view tabular information. Traffic Cameras and Dynamic Message Signs are also available for large urban areas. All map information and data is displayed without using a database or map server.

Here's a link to the application:
