

3.3.2 Mobile Mapping in the Missouri DOT

Presenter

Jason Caldwell
Director of Strategic Accounts
Sanborn
jcaldwell@sanborn.com

Co-Presenter

Ground based mobile mapping using imagery and LiDAR technology is one of the most exciting mapping advances that have evolved in recent years. The presentation will explain the technology and provide examples of uses and applications. Sanborn will discuss the pilot project that is currently being conducted with the Missouri Department of Transportation.
