

6.1.2

Readjustment of the National Spatial Reference System

Presenter

David Conner
National Geodetic Survey, NOAA
conner@cfm.ohio-state.edu

Co-Presenter

The National Geodetic Survey is readjusting horizontal positions and ellipsoid heights for GPS stations in the contiguous United States. <http://www.ngs.noaa.gov/NationalReadjustment/>

This presentation will describe the plan, the reasons for the readjustment, and what it means for users of geodetic control in Ohio and elsewhere in the United States.
