

4.1.1

Working with local government to build a complete dataset (build it once, use it many)

Presenter

David Blackstone

GIS Manager, Office of Technical Services

Ohio DOT

Dave.Blackstone@dot.state.oh.us

Co-Presenter

Daniel Casey

Chief Business Development Officer

Digital Data Technologies, Inc.

dcasey@ddti.net

This presentation will highlight Ohio's Location Based Response System. Learn how you can:

- Increase government funding
- Secure additional highway safety funds
- Improve accuracy of high hazard locations resulting in additional safety improvement funding
- Create one dataset to meet other state and local government needs collaboration with 911
- 911 has a complete dataset, but they need accurate data
- DOT needs a complete dataset per ARNOLD and 911 has it
- Work together and you both get what you need
