

1.1.2

Ohio's new approach to the FHWA functional re-classification process, an enterprise solution.

Presenter

Joseph Hausman
Ohio Department of Transportation
Joe.Hausman@dot.state.oh.us

Co-Presenter

William Ramsey
William Rogers

The Ohio Department of Transportation used an innovative approach to develop, update and publish the Federal Functional Classification (FC) revisions resulting from the 2000 U.S. Census. What had taken several years to complete in the past was accomplished in approximately 4 months. This presentation will cover the development of the Adjusted Urban Area Boundaries, Enterprise use of Data and Systems to update the Road Inventory and associated FC codes, the automated review process that was developed and finally, the high quality maps that were published.
