Mobile Traveler Information Solutions

Presenter

Chris Gerecke

Director of Enterprise Solutions
Timmons Group
chris.gerecke@timmons.com

Co-Presenter

The traveling public has ever-increasing demands for information. To help meet these demands, the Missouri Department of Transportation partnered with Timmons Group to develop their MoDOT Traveler Information application. The application shows current work zones, incidents and weather-related road conditions on state-maintained routes in Missouri. Work zones that may have an impact on travel are loaded automatically. Weather radar is also included and refreshed every 10 minutes. This presentation will focus on the process for building this application and demonstrate how the application has helped MoDOT and travelers.
