Washington State DOT's Airport Information System

Presenter

Alan Smith

GIS Branch Manager

WSDOT

smitha@wsdot.wa.gov

Co-Presenter

WA State Airport Map Portal - An interactive GIS map based system that promotes and supports informed land use decision making by providing online access to critical airport facility/operations information and interactive planning tools. The mapping system is built on standard FAA data models and includes all major airport facility features. It also includes 3D airspace, surrounding terrain and airspace obstacle analysis. Develop and supported by WSDOT.
